

DOOR TRAINERS

EDM, A GLOBAL SUPPLIER OF CABIN CREW TRAINING SIMULATORS, DESIGN AND MANUFACTURE DOOR TRAINERS FOR ALL AIRCRAFT TYPES.

The Door Trainer can be manufactured as a single modular unit, increased to an Extended Door Trainer or integrated into a Cabin Emergency Evacuation Trainer (CEET) with multiple doors and over wing exits, where required.

The exits can be supplied as floor mounted units or positioned at operational height with slides, wing ramps and support structures.

STANDARD DOOR TRAINER FEATURES

- Normal operation
- Door arming / disarming
- Emergency operation
- Emergency lights
- Door status indicators

INTEGRATED DOOR TRAINING MALFUNCTIONS

- Handle blocked
- Door blocked
- Auto slide deployment failure
- Manual slide deployment failure
- Power assist failure
